Introduction:

Sentence 1 – your experimental question. Sentence 2 – your hypothesis. Sentence – 3 why you choose this topic. Sentence 4 – how someone else might use the data and results you are collecting. (What is the point????)

Give the title of the first support article you are using, include author. Write one or two sentences summarizing what it is about. Tell me what information from it you are using in your project, how did it help you? Repeat for other two articles.
